

To whom it may concern: I am totally opposed to the above action. As an XM dealer AND CUSTOMER I feel these services are essential to the traveling public whether it be truckers, salesmen, or folks in RVs. This is a valuable service to know all conditions while traveling across this country. The fact that these other stations are jealous or feel threatened should improve their service instead of going to the U.S. Government to solve their issues.

You may contact me for further comments. thanks.
